VLSI DSP Fall

## Final Project - DCT Design

## ● 設計描述

設計一個 2-D 8-point Discrete Cosine Transform (DCT),1-D DCT 猶如一個矩陣運算,下面即 是設計描述:

$$Z(n) = \sqrt{\frac{2}{N}}c(n)\sum_{m=0}^{N-1}x(m)\times\cos\left(\frac{(2m+1)n\pi}{2N}\right)$$

where

$$C(n) = \begin{cases} 1/\sqrt{2} & \text{for } n = 0\\ 1 & \text{for } others \end{cases}$$

利用矩陣展開

$$Z = \begin{bmatrix} Z_0 \\ Z_1 \\ Z_2 \\ Z_3 \\ Z_4 \\ Z_5 \\ Z_6 \\ Z_7 \end{bmatrix} = \begin{bmatrix} \cos 4\theta & \cos 4\theta \\ \cos 6\theta & \cos 6\theta \\ \cos 6\theta & \cos 6\theta & -\cos 6\theta & -\cos 2\theta & -\cos 6\theta & \cos 6\theta & \cos 2\theta \\ \cos 6\theta & -\cos 6\theta & -\cos 6\theta & -\cos 6\theta & \cos 6\theta & \cos 6\theta & \cos 2\theta \\ \cos 7\theta & -\cos 3\theta \\ \cos 7\theta & -\cos 7\theta & -\cos 7\theta & \cos 7\theta & -\cos 7\theta & \cos 7\theta & -\cos 7\theta \\ \cos 7\theta & -\cos 7\theta & \cos 7\theta & -\cos 6\theta & \cos 2\theta & -\cos 7\theta & \cos 7\theta \\ \cos 7\theta & -\cos 7\theta & \cos 7\theta & -\cos 6\theta & \cos 2\theta & -\cos 7\theta & \cos 7\theta \\ \cos 7\theta & -\cos 5\theta & \cos 7\theta & -\cos 6\theta & \cos 2\theta & -\cos 7\theta \\ \cos 7\theta & -\cos 5\theta & \cos 7\theta & -\cos 6\theta & \cos 2\theta & -\cos 7\theta \\ \cos 7\theta & -\cos 5\theta & \cos 7\theta & -\cos 6\theta & \cos 2\theta & -\cos 7\theta \\ \cos 7\theta & -\cos 5\theta & \cos 7\theta & -\cos 6\theta & \cos 2\theta & -\cos 7\theta \\ \cos 7\theta & -\cos 5\theta & \cos 7\theta & -\cos 6\theta & \cos 2\theta & -\cos 7\theta \\ \cos 7\theta & -\cos 5\theta & \cos 7\theta & -\cos 6\theta & \cos 7\theta & -\cos 7\theta \\ \cos 7\theta & -\cos 5\theta & \cos 7\theta & -\cos 7\theta & -\cos 7\theta \\ \cos 7\theta & -\cos 5\theta & \cos 7\theta & -\cos 7\theta & -\cos 7\theta \\ \cos 7\theta & -\cos 5\theta & \cos 7\theta & -\cos 7\theta & -\cos 7\theta \\ \cos 7\theta & -\cos 5\theta & \cos 7\theta & -\cos 7\theta & -\cos 7\theta \\ \cos 7\theta & -\cos 5\theta & -\cos 7\theta & -\cos 7\theta & -\cos 7\theta \\ \cos 7\theta & -\cos 5\theta & -\cos 7\theta & -\cos 7\theta & -\cos 7\theta \\ \cos 7\theta & -\cos 5\theta & -\cos 7\theta & -\cos 7\theta & -\cos 7\theta \\ \cos 7\theta & -\cos 7\theta & -\cos 7\theta & -\cos 7\theta & -\cos 7\theta \\ \cos 7\theta & -\cos 7\theta & -\cos 7\theta & -\cos 7\theta & -\cos 7\theta \\ \cos 7\theta & -\cos 7\theta & -\cos 7\theta & -\cos 7\theta & -\cos 7\theta \\ \cos 7\theta & -\cos 7\theta & -\cos 7\theta & -\cos 7\theta & -\cos 7\theta \\ \cos 7\theta & -\cos 7\theta & -\cos 7\theta & -\cos 7\theta & -\cos 7\theta \\ \cos 7\theta & -\cos 7\theta & -\cos 7\theta & -\cos 7\theta & -\cos 7\theta \\ \cos 7\theta & -\cos 7\theta & -\cos 7\theta & -\cos 7\theta & -\cos 7\theta \\ \cos 7\theta & -\cos 7\theta & -\cos 7\theta & -\cos 7\theta & -\cos 7\theta \\ \cos 7\theta & -\cos 7\theta & -\cos 7\theta & -\cos 7\theta & -\cos 7\theta \\ \cos 7\theta & -\cos 7\theta & -\cos 7\theta & -\cos 7\theta & -\cos 7\theta \\ \cos 7\theta & -\cos 7\theta & -\cos 7\theta & -\cos 7\theta & -\cos 7\theta \\ \cos 7\theta & -\cos 7\theta & -\cos 7\theta & -\cos 7\theta & -\cos 7\theta \\ \cos 7\theta & -\cos 7\theta & -\cos 7\theta & -\cos 7\theta & -\cos 7\theta \\ \cos 7\theta & -\cos 7\theta & -\cos 7\theta & -\cos 7\theta & -\cos 7\theta \\ \cos 7\theta & -\cos 7\theta & -\cos 7\theta & -\cos 7\theta & -\cos 7\theta \\ \cos 7\theta & -\cos 7\theta & -\cos 7\theta & -\cos 7\theta \\ \cos 7\theta & -\cos 7\theta & -\cos 7\theta & -\cos 7\theta \\ \cos 7\theta & -\cos 7\theta & -\cos 7\theta & -\cos 7\theta \\ \cos 7\theta & -\cos 7\theta & -\cos 7\theta & -\cos 7\theta \\ \cos 7\theta & -\cos 7\theta & -\cos 7\theta & -\cos 7\theta \\ \cos 7\theta & -\cos 7\theta & -\cos 7\theta & -\cos 7\theta \\ \cos 7\theta & -\cos 7\theta & -\cos 7\theta & -\cos 7\theta \\ \cos 7\theta & -\cos 7\theta & -\cos 7\theta \\ \cos 7\theta & -\cos 7\theta & -\cos 7\theta & -\cos 7\theta \\ \cos 7\theta & -\cos 7\theta & -\cos 7\theta & -\cos 7\theta \\ \cos 7\theta & -\cos 7\theta & -\cos 7\theta \\ \cos 7\theta & -\cos 7\theta & -\cos 7\theta \\ \cos 7\theta & -\cos 7\theta & -\cos 7\theta \\ \cos 7\theta & -\cos 7\theta & -\cos 7\theta \\ \cos 7\theta & -\cos 7\theta & -\cos 7\theta \\ \cos 7\theta & -\cos 7\theta & -\cos 7\theta \\ \cos 7\theta & -\cos 7\theta & -\cos 7\theta \\$$

where  $\theta = \frac{\pi}{16}$ 

## 2-D DCT 運算為

$$Y(u,v) = \frac{1}{4}C(u)C(v)\sum_{i=0}^{7}\sum_{j=0}^{7}X(i,j)\times\cos\left(\frac{(2i+1)u\pi}{16}\right)\cos\left(\frac{(2j+1)v\pi}{16}\right)$$

## Peak signal-to-noise ratio

PSNR is most easily defined via the mean squared error (MSE). Given a noise-free m×n monochrome image I and its noisy approximation K, MSE is defined as

$$MSE = \frac{1}{m n} \sum_{i=0}^{m-1} \sum_{i=0}^{n-1} [I(i, j) - K(i, j)]^2.$$

The PSNR (in dB) is defined as

$$egin{aligned} PSNR &= 10 \cdot \log_{10} \left( rac{MAX_I^2}{MSE} 
ight) \ &= 20 \cdot \log_{10} \left( rac{MAX_I}{\sqrt{MSE}} 
ight) \ &= 20 \cdot \log_{10} (MAX_I) - 10 \cdot \log_{10} (MSE). \end{aligned}$$

https://en.wikipedia.org/wiki/Peak\_signal-to-noise\_ratio

- Requirement: 100MHz, PSNR=40dB, area -> as small as possible.
- Input 8-bit (w/o signed bit); output 16-bit (w/ signed bit)
- Please finish this DCT before 2023/1/5, and give a presentation on the class of 2022/1/5.
- A technique report about this filter is also needed. Please upload the report to E-learning system before 2023/1/12.
